

Reliable. Renewable. Remarkable.

Park and Recreational Lighting Solutions

Designed for parks, playgrounds, skate parks, boat launches and more, SOL's Park and Recreation Lighting Systems are the intelligent solar powered lighting solution to utility connected approaches.

Community Playgrounds

Parks

Boat Launches

Park and Recreation Lighting

Energy efficient and reliable lighting enhances the safety and security of visitors, improves appeal, and protects your investment.

Enhances Safety

- Well-lit areas are a safe and welcoming place for visitors, members and staff
- Lighting discourages crime, vagrants, and mischief in and around recreation areas

Improves Appeal

- Illumination improves visibility
- Lighting allows extended operation hours to serve needs of members, visitors and customers
- Visibly demonstrate your commitment to sustainable design

Protects the Investment

- Lit recreation areas reduce maintenance cost due to vandalism and theft
- Provides extended hours of operation
- Lighting recreational area is supported by communities and police patrols

SOL's Solar Lighting Solutions

Solar powered lighting is an economic, reliable, and environmentally responsible way to provide lighting in recreation areas.

Economic

- Solar lighting installs in most locations without costly trenching and grid connections
- No utility bills since the sun provides the energy
- Increased hours of operation

Reliable

- Not susceptible to power failures or brownouts
- SOL's proprietary LED lighting technology lasts for a minimum of 70,000 hours (L-70), that's over 15 years of no light bulb replacements

Environmentally Responsible

- Solar powered lighting emits no CO2 or other hazardous gasses to provide efficient light
- Solar LED lighting contains no mercury or other hazardous material

Reliable. Renewable. Remarkable.

Park and Recreation Lighting Solutions

Economic

SOL's recreation lighting solutions are the most economic way to enhance the safety and improve the appeal of recreation areas. In many cases the installation of a solar lighting system is the lowest cost way to improve an area with lighting. Compared to utility-connected lighting, solar lighting systems avoid costs associated with cabling and trenching, transformers, permits, utility bills and service charges.

Reliable

SOL's solar LED lighting systems are built with sturdy, corrosive and vandal-resistant aluminum and stainless steel hardware. LED lights are protected with polycarbonate lenses. LEDs, NRGLife™ batteries, and associated hardware are protected via an industry-leading FivePlus™ warranty that includes a 20-year limited warranty on the solar panels.

SOL systems are easy to install in most locations without grid connection and are not susceptible to power outages. There is no trenching, cabling, wiring, meters, labor and assembly costs, or utility headaches. SOL's proprietary energy management technology provides a minimum 5-night backup in case of inclement weather to ensure bright, reliable illumination.

SOL's recreation lighting systems are available in a variety of mounting and fixture options to suit your lighting requirements.

Environmentally Responsible

SOL lighting systems are the sustainable choice to reduce your carbon footprint. Recreation lighting solutions from SOL use renewable energy from the sun to store electricity to power ultra-efficient LEDs. This approach requires no connection to the electrical grid and the emission of CO2 to provide light.

SOL's LED technology features cutting edge optical designs and drivers that provide bright light and a service life up to 100,000 hours.

LEED

The Leadership in Energy and Environmental Design (LEED) Green Building Rating System™ encourages and accelerates global adoption of sustainable green building and development practices through the creation and implementation of universally understood and accepted tools and performance criteria.

The use of SOL lighting on your project promotes the use of renewable energy and helps to transform the built environment to sustainability.

About SOL Inc

SOL is the leading manufacturer of commercial-grade solar powered lighting solutions for parking lots, pathways, streets and roadways, signs and billboards, shelters and landscapes.

Since 1990 SOL has introduced innovative, reliable and cost-effective solar lighting systems that provide unsurpassed levels of illumination and reliability. SOL has a distributor network in over 60 countries on six continents with over 40,000 solar lighting systems installed. SOL is ISO 9001:2008 certified and committed to superior design, manufacturing, and customer satisfaction.
