BUY AMERICA ACT COMPLIANCE

SOL Inc. is a US based manufacturer headquartered in Palm City, Florida. We are proud to *design* and *assemble* our light system in the United States. We have been providing solar lighting systems for over 20 years. Several of our customers include the US Military, Department of Homeland Security, National Park Service and many municipalities supported by Federal grants.

Due to economic conditions, component availability and the competitive marketplace SOL sources some components from international suppliers. We have painstakingly performed the documentation and calculations required to assure our customers and ourselves that our systems meet the requirements of the Buy America Act.

Without reservation, SOL is pleased to state that our entire line of solar lighting systems offered for sale in the United States comply with the requirements of the Buy America Act.

BUY AMERICA ACT REQUIREMENTS & COMPLIANCE

It may be helpful to understand the requirements of the Buy America Act (BAA) and how they apply to SOL's solar light systems. The BAA generally requires that only domestic end products be procured by the Government when it purchases supplies and construction materials for public use. In order for SOL to determine if it is in compliance, we have followed these steps:

1. Identify the end product to be delivered. Since an end product is generally defined as a contract line item, you must perform a BAA analysis on each contract line item
2. Identify the place of manufacture of the end product
3. Identify the *components* of the end product
4. Identify the place of manufacture of each component
5. Identify the cost of each component. If more than 50% of the cost of the end product's components were manufactured in the U.S., the end product complies with the BAA

Note: in some contracts, as written by the government, materials manufactured in NAFTA countries or in countries that are members of the World Trade Organization are exempt. These contracts allow for inclusion of the "Trade Agreements Act" in determining compliance with BAA.

EXAMPLES OF SOL'S COMPLIANCE

SOL has performed a complete line review to confirm compliance with the Buy America Act. The following table shows a selection of our systems, indicates the amount of domestic content and confirms compliance with the Law.

Sample of SOL Systems That Comply with BAA

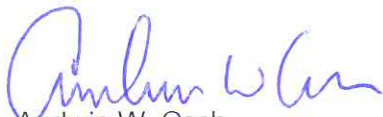

SOL System Model	Component Costs from USA Materials	BAA Status
TPM125-2B100-2QCH	75%	PASS
TPM250-3B100-3QCH	68%	PASS
TPM375-3B100-LED48	67%	PASS
GW135-1B100	76%	PASS
SLHR250-3B100-3QCH	70%	PASS
TSL135-2B100-2QCH	71%	PASS

All of SOL's poles are manufactured in the United States. When SOL provides lighting poles from other suppliers for use with our systems, we always purchase from US manufacturers.

TRANSPARENCY AND QUESTIONS

On any contract with BAA requirements, SOL performs an internal compliance check. Should any written documentation be required, SOL will gladly provide the content analysis precisely for the system or systems being offered.

SOL is always ready to support our customers. If you have any questions concerning the Buy America Act and our compliance, please direct all inquiries to our Inside Sales and Support team at (772) 286-9461, option 1 or email us at info@solarlighting.com
