

Solar Lighting Solutions

Innovating safe and sustainable solar outdoor lighting solutions since 1990

Sol[®] 

Reliable. Renewable. Remarkable.

Why Solar Lighting by Sol Inc?

Need security lights where no conventional power is available? Save on energy? Reduce your carbon footprint? Eliminate rising utility bills?

We've got your solution....

As the trusted world leader since 1990, Sol is the largest and most established firm solely dedicated to the design and manufacturing of solar outdoor lighting solutions.

Around the world, Sol solar lighting systems generate millions of kilowatt hours of trouble-free lighting where conventional power is not practical, convenient, or cost-effective. With Sol's solar lighting systems, say goodbye to trenching, wiring, and utility connections.

We create eco-friendly, commercial/industrial grade solar powered LED lighting systems, and alternative solutions for :

- Streets & roadways
- Billboards & signs
- Perimeters & security
- Remote operations
- Temporary sites
- Parking lots
- Paths & trails
- Bus shelters
- Academic campuses
- Parks & recreation

Whatever your problem is - we have a solution.

RELIABLE

Thanks to advanced engineering and extensive product testing, Sol's ultra-reliable solar lighting systems are easy to install in virtually any location without grid connection and are immune to power outages. Sol's advanced power management system ensures lighting that illuminates even during cloudy weather conditions.

RENEWABLE

Sustainable and energy-efficient solar lighting reduces your carbon footprint and provides perhaps **the most visible** statement of green design principles to employees, visitors, vendors, and shareholders. Sol's solar powered outdoor lighting provides a great return on investment with low installation costs and zero utility bills.

REMARKABLE

Sol's solar LED outdoor lighting:

- Operates maintenance free for 5+ years
- Provides better light quality for improved visibility and safety
- Installed on six continents in over 60 countries
- Allows you to be environmentally responsible

Sol's new IllumiSign™ LED floodlight provides ultra-brite, uniform coverage for solar or conventional power grid applications.

Sol's LED lights with crisp cut off lines provide uniform brilliance where you need it.

Sol's SL series solar lighting provides ultra-bright, uniform coverage for area and security applications.

Sol's dual SLV series solar lighting for roadways generate high intensity illumination for transportation visibility.

Proven products for multiple applications

Solar LED Area & Security Lighting

Clear, white light for maximum visibility for safety and security. The ideal solution for parking lots, paths, parks, perimeter fences, gates, and worksites where a hardwired connection is impractical, impossible or cost prohibitive.

Solar LED Street & Roadway Lighting

Illumination for larger areas with the highest intensity light for enhanced cyclist and pedestrian safety on streets, roadways and intersections. Mounting and fixtures meet or exceed local lighting requirements.

Solar LED Sign & Billboard Lighting

The flexibility to light billboards and signs anywhere, from small backlit signs to full-size billboards. These super-bright, super-efficient and vandal-resistant solar LED systems install quickly and easily with no trenching required and no worries about power lines, portability or power outages.

Solar LED Transit & Shelter Lighting

Optimal illumination for transit passengers, park visitors or shelter users. Vandal-resistant and equipped with a 5-day (minimum) battery back up. These low-voltage systems are ideal for kiosks, vault toilets, all varieties of gazebos, smoking shelters, and storage sheds.

The ENLIGHTENING Facts

- 30,000+ systems installed in 60 countries since 1990
- R&D team with a century of expertise in optics and energy conservation
- No products contain mercury or other hazardous materials
- 5 year system warranty; solar panel warranted for up to 25 years
- Meets or exceeds hurricane building codes
- IDA Dark Sky Compliant fixtures available
- ISO 9001:2000 Certified Company
- Products are tested by the National Renewable Energy Laboratory, the Sandia National Laboratory (New Mexico) and the Florida Solar Energy Center

What Sol Customers say:

“On behalf of Caribbean Infra-Tech, Inc. (CIT), I highly recommend selection of solar powered lighting systems from Solar Outdoor Lighting, Inc. (SOL) to all commercial, residential, industrial and institutional developers. With regard to technical performance of the product, SOL lighting systems have been highly successful in all installations in the US Virgin Islands. CIT will continue to recommend SOL to our clients.”

— Onaje Jackson, *President, Caribbean Infra-Tech Inc., St. Croix, USVI*

“For the 1996 Olympics in Atlanta, we asked Sol to illuminate eight parking lots with 8,000 spaces in 21 days—and have them lit by opening day. Sol did it and their lights worked beautifully.”

— Hank Padgham, *Associate Director, Transportation Department, Atlanta Olympics*

“Your signs (on the Florida Turnpike) are a model of what solar lighting can provide. Many engineers driving our nighttime review remarked on how well lit and evenly spread the illumination is. When I tell them they’re solar [powered], they can hardly believe it.”

— Robert McKeehan, *Assistant Traffic Operation Engineer, Florida Department of Transportation*

“Sol’s lighting systems installed easily and operated on solar power the very first evening. The immediate response from federal employees and visitors was all positive.”

— Tony Miro, *Branch Chief, General Services Administration Protective Service Division, Puerto Rico*

“Your street lighting at our resort lived up to our high standards and performed flawlessly over the past eight months. We look forward to further installations.”

— Tom Wuebben, *Director of Operations, Emerald Bay Resort, Bahamas*

“I just received this message from a Kenyan village: ‘Greetings and blessings from Nairobi, [where] I learned that, unbelievably, the overjoyed inhabitants of Kitui were watching the World Cup. What a feat—thanks to the solar system.’”

— Father D’Agostino *Nyumbani Orphanage, Nairobi, Kenya*
